

Rabab Mohamed

Data scientist | AI & Machine learning

✉ rababokasha123@gmail.com | ☎ +201153211964 | ♀ 6th of October, Giza | [LinkedIn](#) | [GitHub](#)

PROFILE

Highly skilled Data Scientist with robust, hands-on experience in machine learning algorithms, advanced data preprocessing, and rigorous statistical analysis. Passionate about building intelligent systems and solving real-world problems through data-driven approaches.

EDUCATION

Cairo University — Faculty of Computers and Artificial Intelligence 2023 – Present
B.Sc. in Computer Science | Expected graduation: 2027

EXPERIENCE

DEPI – Data Scientist Trainee Jul 2026 – Present

- Developing practical skills in Python, SQL, data analysis, and machine learning through hands-on training and projects.
- Working with real-world datasets to perform data cleaning, preprocessing, exploratory data analysis (EDA), and visualization.
- Applying machine learning techniques to build, evaluate, and improve predictive models.

Nile University – Research Intern | [Certificate](#) Jul 2026 – Aug 2026

- Investigated the generalizability of image-based methodologies for PCOS detection across ovarian ultrasound datasets from diverse populations.
- Curated and preprocessed normal and PCOS ovarian image datasets for comparative analysis.
- Contributed to the preparation and documentation of findings for a research manuscript.

PROJECTS

Breast Cancer Prediction Model

- Cancer prediction model classifies tumors as benign or malignant. Using Decision Tree, Naïve Bayes, Rule induction, Neural Network.
- Deployed as a live web app on Stream lit Cloud feature sliders, multi-model comparison dashboard, and human-readable IF-THEN rules for clinical interpretability.

Housing clustering analysis

- Performed clustering analysis using K-means and DBSCAN by Python, scikit-learn, PCA

Hybrid Movie Recommender System

- Recommend movies based on user movies history. Generate similar movie suggestions using ARM + TF-IDF + cosine similarity.

Automated Material Classification System

- Classify images using Computer Vision and Machine Learning techniques.
- Live camera frames in real-time by Python, Support Vector Machine, KNN

COURSES

Machine Learning A-Z [2025]

Udemy | 2025

- Completed comprehensive Machine Learning course covering Data preprocessing, Data Cleaning, supervised & unsupervised learning, and model selection with practical implementations.

SKILLS

Languages: Python, SQL, C++, Java, JavaScript

Machine Learning / AI: Data Cleaning, Data Preprocessing, Feature Engineering, Statistical Analysis, Supervised & Unsupervised Learning, Scikit-learn

Data Visualization: Pandas, NumPy, Matplotlib

Tools: GitHub, Stream Lit, Jupyter, VS Code, Dash

Soft skills: Time management, Teamwork, Communication
